

## Nitrogen Fertilizer Use Report | PWCP

This document must be completed by applicants who are applying for Soil Testing; Soil Mapping; and/ or Upgrades to Seeder Equipment, and do not have an accompanying practice. The purpose of this document is to collect the historical nitrogen fertilizer rate usages for applicants/ operations that are applying for one of the PWCP funded practices.

The applicant must report how much nitrogen fertilizer was applied on acres before the funded practice was implemented and how much nitrogen fertilizer is being used after the funded practice was implemented on those **same** acres.

Nitrogen Fertilizer Use Report Required For:

- Equipment Upgrade – only acres where this piece of equipment was utilized.
- Soil Testing/ Mapping – only acres where the soil testing/ mapping occurred.

PWCP Funded Practice

Equipment Upgrade

Soil Testing/ Mapping

| Nitrogen Fertilizer Rate Usage <u>Before</u> Funded Practice |                                   |                 |
|--|-----------------------------------|-----------------|
| Total Acres  | Metric Tonnes of Nitrogen Applied | Fertilizer Type |
|  |                                   |                 |
|  |                                   |                 |
|  |                                   |                 |
| Legal Land Descriptions (Acres)                              |                                   |                 |
| 1.   | 6.                                | 11.             |
| 2.   | 7.                                | 12.             |
| 3.   | 8.                                | 13.             |
| 4.   | 9.                                | 14.             |
| 5.   | 10.                               | 15.             |

| Nitrogen Fertilizer Rate Usage <u>After</u> Funded Practice |                                   |                 |
|---|-----------------------------------|-----------------|
| Total Acres   | Metric Tonnes of Nitrogen Applied | Fertilizer Type |
|   |                                   |                 |
|   |                                   |                 |
|   |                                   |                 |
| Legal Land Descriptions (Acres)                             |                                   |                 |
| 1.  | 6.                                | 11.             |
| 2.  | 7.                                | 12.             |
| 3.  | 8.                                | 13.             |
| 4.  | 9.                                | 14.             |
| 5.  | 10.                               | 15.             |

Note: When reporting on the metric tonnes of fertilizer applied after the soil testing/ soil mapping, you can report on the implemented OR planned changes in nitrogen fertilizer rates.
